

Biographical Document File Collection

c. 1888-present

2161 textual records, 2 booklets | 3 linear feet | 3 boxes

This collection is composed of a variety of people who had some history with the city of Corona. Original documents that were too few in number to warrant creating a manuscript collection are stored in the biographical document file collection. The items are mostly biographical in nature; however, some files contain extensive family history such as newspaper clippings, family trees, photocopies of photos and property deeds. Memorial and funeral service leaflets, wedding announcements, retirement announcements, tributes and correspondence are a few items found in the biographical document file collection.
